Today's respiratory concerns (Face Masks) are growing at an alarming rate. **CENX Reusable Face Mask** is built to tackle contagions in the air in an effort to prevent them from affecting you so that you can breathe with ease. Wearer experiences an assured protection against particles in the air like dust, sand, pollen, droplets and smog. Stay safe and never move around without it. **CENX range of Reusable Face Mask** is a CE Certified Personal Protective Equipment (PPE)

In CENX range of products treated with **ViralOff - Swedish Technology**, over 99% of viruses in the treated material will be killed over a two-hour timespan (ISO18184:2019, antiviral testing on ATCC VR-1679 (H3N2). This is tested as per ISO18184:2019 and is an assurance that the product lives up to a standard of performance. ViralOff doesn't interfere with the skin's natural bacterial flora. To achieve best performance of the product, washing should be minimised as products can be used multiple times and serves longer.

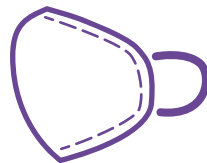

Note: This mask is intended to safeguard against disease and is not a medical device.

Features

Fit

A one-size-fits-all solution with an adjustable nose pin.

Skin-Friendly

Skin-friendly binding that holds shape for a long time.

Multi-use

Completely washable and reusable.

Breathe Easy

Breathable mesh eliminates heat retention.

Less Fogging

Designed to reduce eyeglass fogging.

Adjustable

Ear loops for a comfortable fit.

A multi-layered design for easy breathability and advanced air filtration.

FREQUENTLY ASKED QUESTIONS - FAQs.

What is CENX Reusable Face Mask?

CENX Reusable Face Mask are CE approved and FDA certified respirator that is designed keeping two important factors in mind, reliable airflow and a universal fit ensuring comfort when worn. It is unique in the fact that these CENX VO range is composed and are treated with Swedish-based ViralOff technology.

What is CENX Reusable Face Mask composed of?

CENX Reusable Masks has a multi-layer filtration system consisting of 1 x Triple-Layered Breathable Mesh, 1 x Spunbond Filters (each filter is double-layered), 1 x Melt Blown (each filter is double-layered) and 1 x Soft Cotton Fabric.

What is ViralOff Technology?

ViralOff Polygiene technology is a certified treatment of textiles and other products that reduces viruses by over 99% in a span of two hours. ViralOff stops viral activity through interactions with key proteins. It shows a 99% reduction of many different viruses, on a treated material and takes up to 2 hours to completely work. Shown by test ISO18184:2019, ATCC VR-1679 (H3N2). This technology benefits the user to WEAR MORE and WASH LESS.

Does ViralOff fight all viruses?

It fights a range of viruses. Polygiene has tested the active ingredient against Influenza A, BirdFlu, Norovirus and Corona (SARS) over the years, and in all cases, they have achieved 99% levels of reduction. What they bring with the ISO18184:2019 standard is a test that can be made for any specific product for effect in the two hours timespan, where it has to reduce the virus over 99%, to pass. This test uses viruses of the Influenza A strain as of now.

Do I have to pre-wash my CENX Reusable Face Masks before using it?

No. We pre-wash our fabric to allow for any possible shrinkage. The fabric is then treated with ViralOff. You are supposed to only wash it after multiple uses and only when needed.

What is a Respirator?

A respirator is a device designed to be worn over the mouth and nose, which helps you to breathe cleaner & healthier air by filtering out chemicals, particulate matter and infectious particles such as certain bacteria and certain viruses. CENX range is a respirator that fits this description.

How long will my CENX Reusable Face Masks last?

CENX Reusable Masks will last you for up to 30 (or) 20 gentle hand washes. It should be discarded after that and be replaced with a new one. CENX (VO / VO+) does not need to be washed frequently as the ViralOff technology used on it does the job of blocking contagion and thereby disinfecting it. For best performance and sustainability, wash less and only when needed. In theory, CENX Masks are designed to last you for a reasonable time.

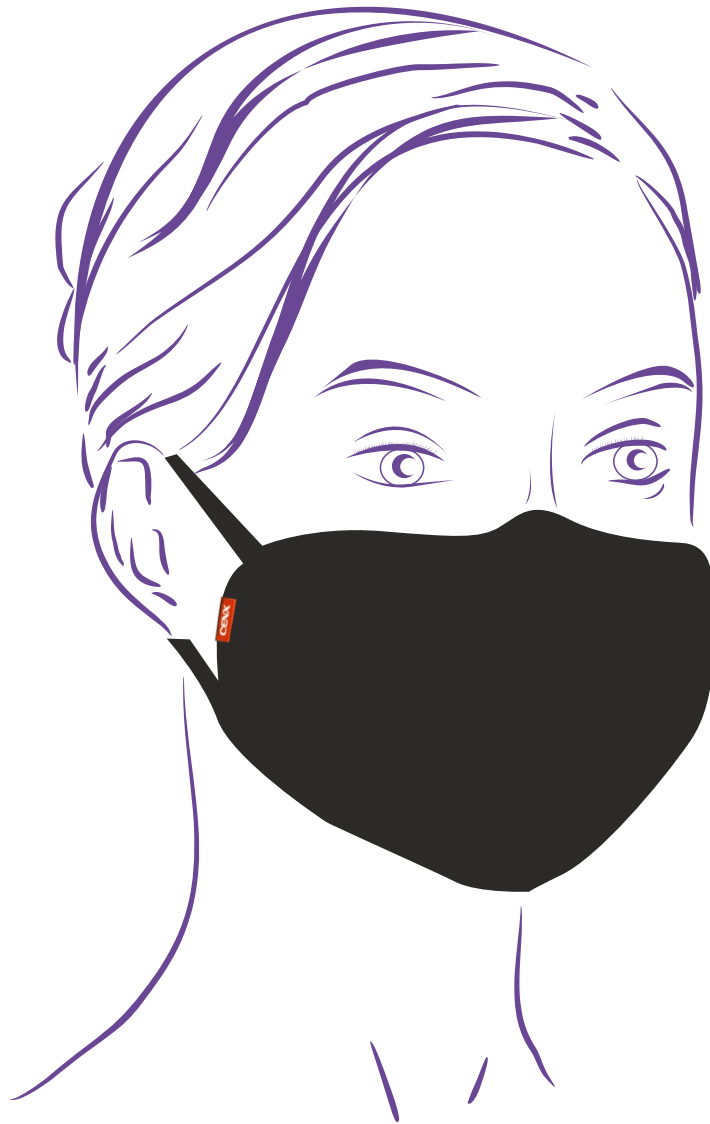

Where and when should I wear CENX Reusable Face Masks?

Always wear CENX when stepping out. This respirator can be worn while stepping out for activities like - outdoor walks, long-distance commutes, biking, cycling, at the supermarket, traffic duty, outdoor security, delivery jobs, police work, traveling to school/college, flying, train travel etc.

How do I wear CENX Reusable Face Masks?

- | Take the respirator (inner layer facing upward) by the ear loops.
- | Place the respirator over your face while making sure that the nose clip is positioned on your nose.
- | Place the ear loops over both the ears.
- | Adjust the mask over your face so that the top line of the respirator covers half of your nose. Ensure that your nose, mouth and chin are covered properly with the respirator.
- | Adjust the bendable nose pin to follow the natural contours of your nose for a perfect fit

MASK SIZE CHART

Measured from the bridge of the nose under the eyes till just below the chin and then from side to side

KIDS

(4X5.5 Inches)

For children till the age of 12.

MEDIUM

(5X8 Inches)

Individual weighing 45 kg to 70kg

REGULAR

(5.5X9 Inches)

Individual weighing 70 kg to 110 kg

**CENX - Melt-Blown Range (ViralOff Infused)
ViralOff - Swedish Technology**

ViralOff Polygiene technology reduces viruses by 99% in a span of two hours. (ISO18184:2019) Specifically designed for longer useage with less washing.

- Made using multiple air filtration layers.
- Treated with ViralOff – Sweden-based anti-viral treatment.
- Comes with an adjustable nose pin.
- Has adjustable ear loops that can be tightened/loosened.
- FDA approved air filters.
- Hassle-free breathability.
- Almost no eyeglass fogging.
- Respirator designed for advanced protection.
- Does not require regular washing.
- Wash less, use more. Multiuse respirator

**CENX - Melt-Blown Range
Breathability at its finest**

It is designed to protect you against nonoily particles in the air like dust, sand, pollen and smog. A completely washable and reusable respirator.

- Made using multiple air filtration layers.
- Comes with an adjustable nose pin.
- Has adjustable ear loops that can be tightened/loosened.
- FDA approved air filters. Hassle-free breathability.
- Almost no eyeglass fogging.
- Dependable protection against a range of contagions.
- Multiuse, washable respirator.

CENX products manufactured in India have been certified to be in compliance with the requirements of Quality Management System ISO 9001:2015, Medical Devices Quality Management ISO 13485:2016 and has been CE certified for the scope of manufacturing high-grade, washable and reusable respirators (masks) and PPE kits by the UASL. These products also comply with the FDA's requirements and is FDA certified by the QAAICB, UK.
